Professional Summary

Full Stack Developer with hands-on experience building scalable web applications using Next.js, Node.js, Express, MongoDB, and PostgreSQL. Strong focus on real-time systems, PWAs, and backend performance optimization. Experienced in hackathon-driven development, collaborative projects, and shipping production-ready features.

Projects

SnipZen – VSCode Snippet Sync Platform Live | [GitHub](#) Jan 2026
VSCode-API | Next.js | MongoDB | TypeScript

- Built a VSCode-Extension with a Web platform to manage, sync, and reuse code-snippets across multiple devices, developed together with my classmate.
- Implemented secure authentication using JWT and Personal Access Tokens for safe extension–website integration.
- Designed advanced search with filters for language, tags, etc improving snippet discovery efficiency by 35%.
- Developed Environment-Snapshot sharing for extensions, settings, and keybindings to replicate VSCode-setups instantly.

CoFlow – Real-Time Team Collaboration Live | [GitHub](#) June 2025
Next.js | Express.js | MongoDB | Socket.IO | Playwright | Redis | Docker

- Collaborated with my classmate to build CoFlow, a real-time collaboration platform for developers and hackathon teams to discover events, manage team tasks, and communicate efficiently.
- Built an automated system to scrape global hackathon data every 10 hours using Node-Cron and Playwright for consistent event updates.
- Designed a Socket.IO-based task workflow for project teams, improving progress tracking and collaboration by 30%.
- Implemented team-based group chat with seen-by tracking and typing indicators, enhancing communication in real time.
- Engineered a Redis-powered push notifications system with WebPush + Service Workers, boosting offline engagement by 40%.

Achievements

3rd Place – Srishti Hackathon, Dept. of CSE, SNIST [GitHub](#) 2025

- Built a placement-focused **LMS Backend-System** with a 5-member team; secured 3rd-place after pitching to faculty judges.
- Developed FastAPI-based core backend features: JD Skill Extractor & Learning Path Generator and an ATS-style Resume Analyzer with scoring and feedback.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python
Frameworks & Libraries: Next.js, React.js, Node.js, Express.js, Socket.IO, Jest, Playwright
Databases: MongoDB, PostgreSQL, Redis
DevOps & Cloud: Git, Linux, Docker, GitHub Actions, AWS (EC2, S3, IAM)
Other: GraphQL, REST APIs, PWAs, MVC Architecture

Education

Sreenidhi Institute of Science and Technology, Hyderabad 2023 - 2027
B.Tech in Computer Science and Engineering **CGPA: 7.3**
Relevant Coursework: Object Oriented Programming, Relational Databases, Discrete Mathematics, Data Structures and Algorithms

Sri Chaitanya Junior College, Jagityal 2021 - 2023
Intermediate, MPC **Percentage: 89%**
